## ACADEMIC PROJECTS

**Project Title:** Job Portal
**Languages and Framework:** PHP, CSS, Javascript, Ajax, MySql, PDO.
**Description:** Job portal was a website to search for job and apply for job where jobseeker and employer comes together where employer can post jobs and job seekers can apply for jobs. Where users can add reviews where any user know about company and many more features.

**Project Title:** Hospital Project
**Languages and Framework:** ASP.Net, MVC, Entity framework, MySql.
**Description:** Hospital Project was a redesigned project to build some extra feature where patient, doctor or other user can register, login, book appointment and many more features.

**Project Title:** Freelancer
**Languages and Framework:** PHP, MySql.
**Description:** Freelancer website was developed so that a person having skills can earn from home. Various companies can post projects and freelancer can earn money by completing that projects.

- Most important part was to assign the project to the selected freelancer. The project should be assigned to selected freelancer only.

**Project Title:** Crime Tracker
**Languages and Framework:** JSP/Servlet technology, NetBeans, MySql.
**Description:** This website was developed to help the citizens to report an FIR against crime from anywhere in India. So that police can take action against crime immediately.
- Here every citizen needs to register themselves by **ADHAAR CARD** so that no fraud complains are registered and if such things happens then that person will be identified easily and action can be taken against fraud complains.
- Anyone can report an FIR. That FIR directly goes to headquarter and that officer will reassign that FIR to the local police station.
- And after that police will update that FIR and person who has reported the FIR can see the updates and if police is not doing anything he/she can write message to headquarter.

**Project Title:** Restaurant project
**Languages and Framework:** HTML, CSS and Javascript.
**Description:** Restaurant project was a restaurant website with multiple feature where user can view menu online, reserve table for particular date and many more.

**Project Title:** Animation
**Languages and Framework:** HTML, CSS, 3D Animation, jQuery.
**Description:** This project was build to show some animation skills and done very well with showing rotation frames and toggle it into square when button is clicked.

## WORK EXPERIENCE

- **Air Canada**                                                                                          **Present**
  Station Attendant
  - Air Canada is a fast paced environment work place where I deal with multiple flights loading and offloading according to the report. Also help out other crews if they requires with additional help.

## EDUCATION

- **Web Development**                                                                                  **Pursuing**
  Humber College
- **Master of computer application**                                                                         **2017**
  Dharmsinh Desai University, India.
- **Bachelor of computer application**                                                                      **2014**
